

"You could be just 30 short minutes away from turning your Network Marketing business upside down and smashing every last barrier to success...forever!"

The financial and personal freedom you were looking for when you got into network marketing just isn't happening, is it?

Perhaps it's because you **don't know what to say to get people interested enough to look at your offer**. A lot of people tell me they have that problem.

"I earned enough up-front money in a single day to almost pay for my entire month of coaching!"

— Roland Michelli, American Petroleum Promotions

Or, maybe you can't bring yourself to pick up the phone and make those prospecting calls. Join the club! All successful network marketers have gone through that phase.

Maybe you're like a lot of network marketers who are spending more than 30% of their network marketing income to run and support their business. Or, worse yet, maybe you are actually spending **MORE** than you're making. A lot of superstars have been in that boat before too.

These are just a few of the barriers to success that stop people from getting their business to duplicate and to produce the kind of automatic income that they were hoping for. There are countless more and maybe you know some of them.

You can destroy those barriers that are stopping you from being successful in Network marketing.

Do you know how to do it?

(turn the page to find out)

Here's what you can do to smash the barriers to your success in network marketing...

Steal What you Need to be Successful!

That's right – steal it. Let's face it; there are a lot of successful network marketers out there. They have the lifestyle that you want. They earn the income that you want to earn. They've duplicated their businesses and their downline is motivated, focused and making money.

"My downline has doubled!"
— Nataliya Berenznyuk, Excel/Vartec Communications

They Have the KNOWLEDGE that you need – so steal it!

You need to reach right into the heads of successful people and pull out whatever it is they know that lets them live like you're not living. You need to discover what it is they do that lets them spend what you can't afford to spend. Find out how they have time to enjoy the things in life that you don't have the time to enjoy.

And you can steal it WITHOUT going to jail.

All it takes is one **FREE** 30-minute coaching call from the MLM experts at MLMU and you can be on your way to creating the lifestyle you've been hoping for, just like Michael Toscano of Excel Communications.

"I'm happy to say that in only four months after joining the MLMU Business Coaching program my income has increased by \$2,000 a month! Business Coaching has done wonders not only for me but also for the rest of my organization. In the past several weeks alone my team has brought on 23 new business partners and we are all on fire!"

— **Michael J. Toscano,**
Regional Training Director, Excel Communications

You see, there is nothing wrong with Network Marketing, and I'm willing to bet that there is nothing wrong with your products. The problem is:

There is something wrong with the way Network Marketers have been trained.

(turn the page to discover what the problem is)

The Problem with Network Marketing Training is...

Training all by itself doesn't work. Here's why:

Let's say you go to a seminar or leadership conference and get all fired up. You can't wait to get home and start telling people about your new products and your business opportunity -- right? I know, it's happened to me too.

*"When I started coaching I was in a negative cash flow.
Today, I am in a positive cash flow!"*
— Tammy Sutherland, Pre-Paid Legal

When you get home, distractions begin to creep in. Your friends and family members don't seem to share your enthusiasm about your newfound skills. They didn't go to the seminar. Pretty soon you find yourself focusing more on **THEIR** problems and concerns than your own. After a short while, the seminar becomes a faded memory.

Sound familiar?

It does to me and just about every other successful Network Marketer that I know. We've all been there just like you. The only difference is – we've destroyed that barrier and went on to become a success. You can too.

Coaching breaks the failure cycle.

A personal coach works just like a personal fitness trainer, but the goal is building success instead of building muscles. A coach helps you create a business plan that will show you step-by-step and day-by-day how to spend your time and what you need to be doing to build your business.

*"My Business Coaching Program started only a month ago
and already my confidence and effectiveness have grown
ten times."*
— Jessica Stone, FreeLife International Distributor

They work with you to set goals, identify areas that need building up, and create a total success plan that's tailored to **YOUR** needs.

You'll discover how the superstars generate leads -- lots of leads -- without paying for them. Your coach will practice, drill and rehearse with you to help you master your presentations. Plus, your coach will help you uncover hidden talents you may have and have been overlooking that will fuel the fire for duplicating your business. **And you can get started on this new road to success for FREE!**

Get your Free Business Coaching Session now. Just Call 999-999-9999.

That's all it takes to experience what Gini Elliott experienced.

"I just want to let you know that I had the biggest check ever with my business last month — almost double! We had a contest going on for the months of Jan and Feb and it was a stretch! I really believe that if I wasn't in the MLMU coaching program, I would not have gone the extra mile that it took to double my income. By the way that check was \$5,900.00. So I can literally say that it paid for my coaching program. Thanks MLMU!!!!!!!!!"

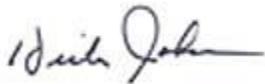

— *Gini Elliott,*
Melaleuca Marketing Executive
